

64th ANNUAL

South Florida's Wild Things "Rise of the Exotics"

South Florida has a tropical climate, so, any animals, plants, fishes, reptiles, insects, and invertebrates from other tropical climates around the world, can, and do survive and thrive here. The list is endless, starting with the invasive that gets most of the press, the Burmese Python, who is decimating all native wildlife in the Everglades including the alligators, in the ocean, the lion fish, eats everything on the reef that can fit in its mouth. You can find a list of invasive critters at <https://myfwc.com/wildlifehabitats/nonnatives/> or the link, <https://www.yahoo.com/lifestyle/invasive-species-florida-10-worst-193059912.html>

Register for the 64th Scoutmasters Camporee February 16 - 18, 2024

Come see how many invasive species you can identify!!!

Camporee Chief: Paul Spalding
